Dear Theo:

Per the letter I sent you via facimile on 4Oct, and our most recent phone conversation of 1Nov, I am sending you the enclosed documents for your review. First is a copy of TruSeal's United States Patent Application for a ribbed tube continuous flexible spacer assembly. This application should be considered the valuable and Confidential Information of TruSeal Technologies and I would ask that you treat this information accordingly. This application discloses and claims a number of inventions. Based on TruSeal's review of the SeaPines meeting as well as our own discussions, you are an inventor of at least one of these inventions. Subject: Ribbed Tube Continuous Flexible Spacer Assembly

Dear Jim,

Via internet I understand that the patent application of TruSeal for the "Ribbed Tube Continuous Flexible Spacer Assembly" is pending.

As I already indicated to you several times I am of the opinion that I am the first inventor of this development, of which my first ideas date already from 1993.

As a consequence it is within my right to market this concept either by myself or via third parties, because I have never given TruSeal a verbal or written permission to apply for a patent under the TruSeal name.

If you have any questions on this issue, please do not hesitate to contact me.

With kind regards

Theo van de Pol
